CONCRETE RESURFACING

SYSTEMS AND SOLUTIONS

EXTERIOR

STAMP-IT

Create the look of brick, slate, flagstone, tile, or stone. Stamp-It is a 1/4" thick polymer modified cementitious overlay designed to permanently transform plain and ugly concrete into a beautiful, decorative surface. For use over existing concrete on pool decks, patios, driveways, and walkways, Stamp-It is appropriate in commercial and residential environments. Stamp-It provides the look and texture of stamped concrete without removing your existing concrete.

TEXTURE-CRETE® BROOM ON

Texture-Crete Broom-On is a polymer-modified cementitious coating, finished with a highly durable acrylic sealer. This system is designed to cover or restore old, rough, stained or poorly finished concrete. Texture-Crete Broom-On can be installed in both commercial and residential environments such as driveways, courtyards, garage floors, and pool decks. This system is a cost-effective option that produces a functional and utilitarian broom finish.

EXTERIOR

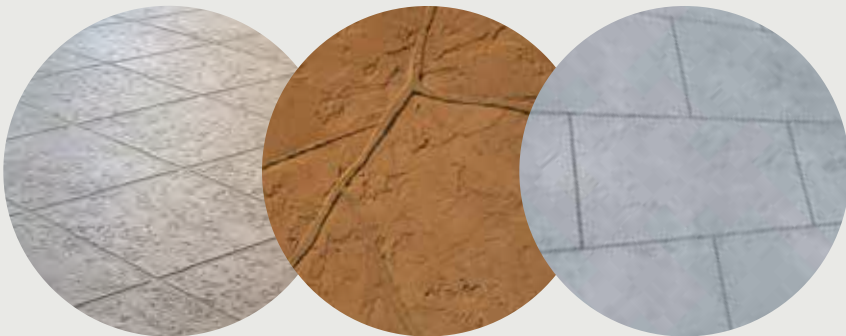

TEXTURE-CRETE® WOOD FINISH

Texture-Crete Wood Finish is a decorative topping designed to transform concrete into a wood-textured finish, producing a traditional decking finished look like cedar, redwood, or composite. This system can be installed in commercial and residential environments like driveways, showrooms, walkways, and pool decks.

TEXTURE-CRETE® CUSTOM FINISH

Texture-Crete Custom Finish is a decorative option that can be tailored to create a more sophisticated design aesthetic. Artistically merged colors enhance smooth or subtly textured patterns like tile and flagstone. Water-Based Stain Blends and clear sealer achieve this finish. The utilization of different spray and brushing techniques, seam tape, and stone strips also can achieve a multitude of finishes.

EXTERIOR

TEXTURE-CRETE®

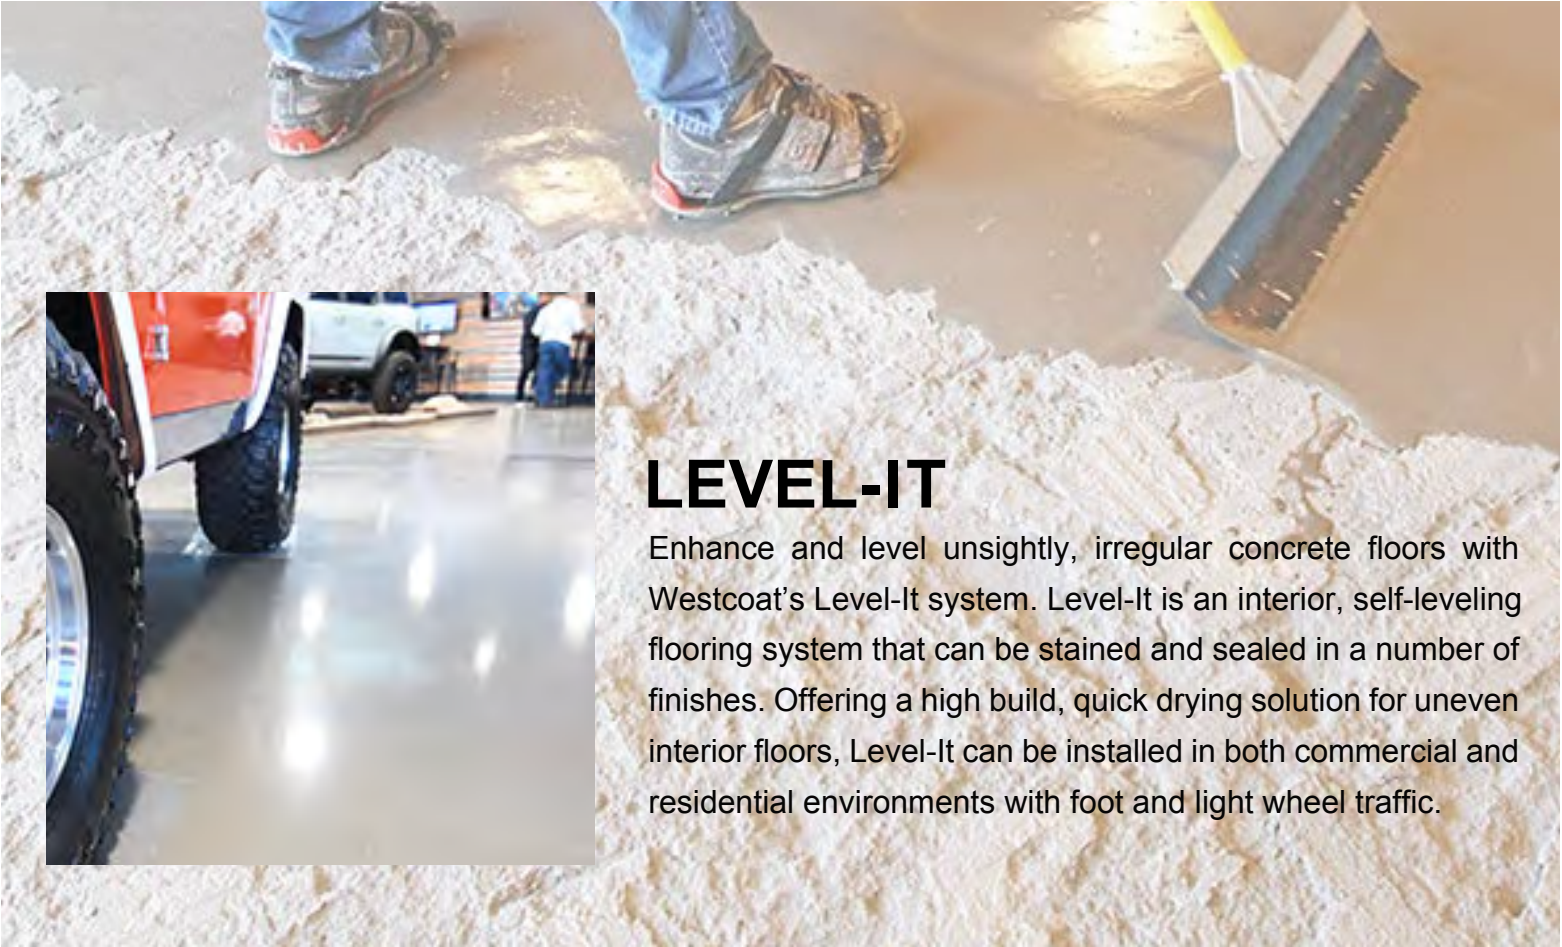

Resurface and beautify existing concrete with Texture-Crete, a series of polymer modified cementitious coatings designed to resurface concrete. Texture-Crete gives plain concrete a durable smooth or textured finish. Traditionally a standard or knockdown texture, the TC Solar Reflective Finish System can be applied directly over existing concrete and is suitable for both commercial and residential environments.

TEXTURE-CRETE® SOLAR REFLECTIVE FINISH

The TC Solar Reflective Finish System helps reduce the Urban Heat Island Effect and can lower the surface temperature by utilizing white cements and infrared pigmented topcoats. This system also meets the requirements of California Title 24, is Cool Roof Rating Council Certified, and can be installed with various textures and patterns that will work in many different applications.

INTERIOR

LEVEL-IT

Enhance and level unsightly, irregular concrete floors with Westcoat's Level-It system. Level-It is an interior, self-leveling flooring system that can be stained and sealed in a number of finishes. Offering a high build, quick drying solution for uneven interior floors, Level-It can be installed in both commercial and residential environments with foot and light wheel traffic.

TC INTERIOR

Beautify your interior floor with TC Interior, specifically designed for the interior environment for an elevated look. This system offers a smooth or slightly textured finish, highlighted with a variety of color and pattern choices, and finished with a durable satin or high gloss sealer. Color with Westcoat SC-35 and Water-based Stains or simply trowel smooth for a sleek concrete look. Texture-Crete Interior is a topping that is designed to be a seamless and easy-to-clean alternative to carpet, tile, and other traditional flooring options.

WHY CHOOSE WESTCOAT?

TOUGH, DURABLE, AND RIGOROUSLY TESTED.

Our products are made to last. Westcoat cementitious coatings stand up to stains, weather and UV rays as well as heavy foot traffic and vehicular traffic. Texture Coat systems are suited for both residential and commercial environments.

LOW OR ZERO VOC PRODUCTS.

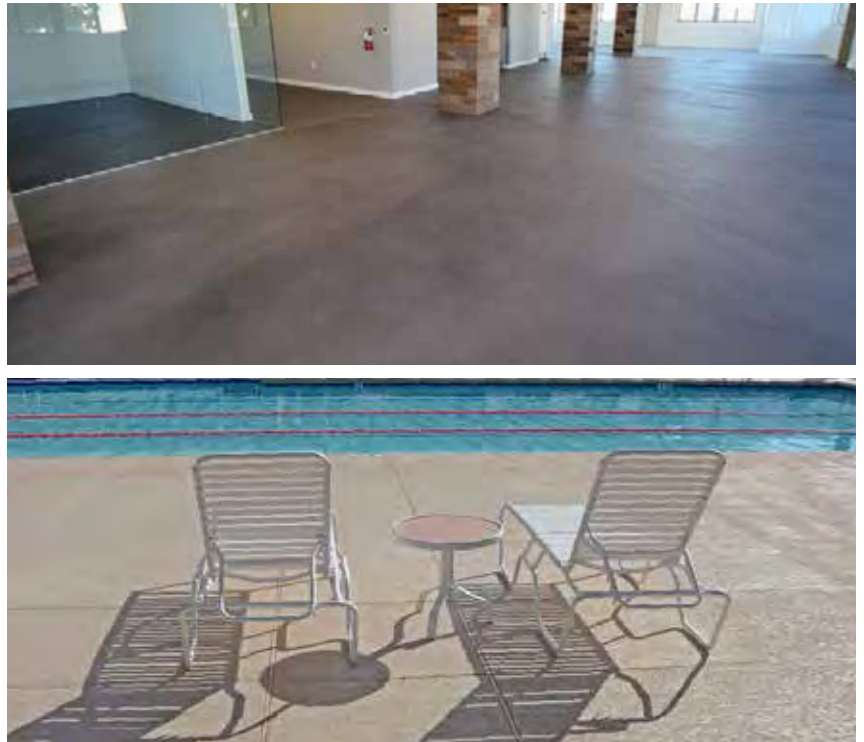

Breathe easy. Many Westcoat products contain low or zero VOCs, making them perfect for environmentally-conscious and green build customers.

NO MORE GUESSWORK.

Westcoat's Texture Coat line takes the guesswork out of getting the right system selected for the job. Made to adhere with long-lasting, durable results, Westcoat's Texture Coat Systems are the next generation of protective coatings.

EXCEPTIONAL CUSTOMER SERVICE.
