

Westcoat Specialty Coating Systems - CES course

Function & Form in Resinous Flooring

This session will provide attendees with a detailed description of the various resinous flooring applications available. Topics in this session will focus on materials, applications and decorative aesthetics.

Learning Objectives:

- Define surface preparation methods when installing resinous flooring.
- Examine the differences between water-based and 100% solids epoxy.
- Identify the appropriate applications when specifying resinous flooring.
- Explore the various decorative finishes available for resinous flooring.

Course Number: AIACES003620

Units Earned: 1 LU / HSW

Provider Name: Westcoat

Provider Number: 40107478
