

ABOUT LEVEL-IT

Enhance and level unsightly, irregular concrete floors with Westcoat's Level-It™ system. Level-It is an interior, self-leveling flooring system that can be installed from 3/8 to 2 inches, stained and sealed or polished in a number of finishes. Offering a high build, quick drying solution for uneven interior floors, Level-It can be installed in both commercial and residential environments including private residences, sun-rooms, offices, restaurants, showrooms, and environments with foot and light wheel traffic.

- Covers uneven concrete
- High Build
- Stainable
- Polishable
- Variety of Colors and Sheens

FOR PROFESSIONAL USE ONLY

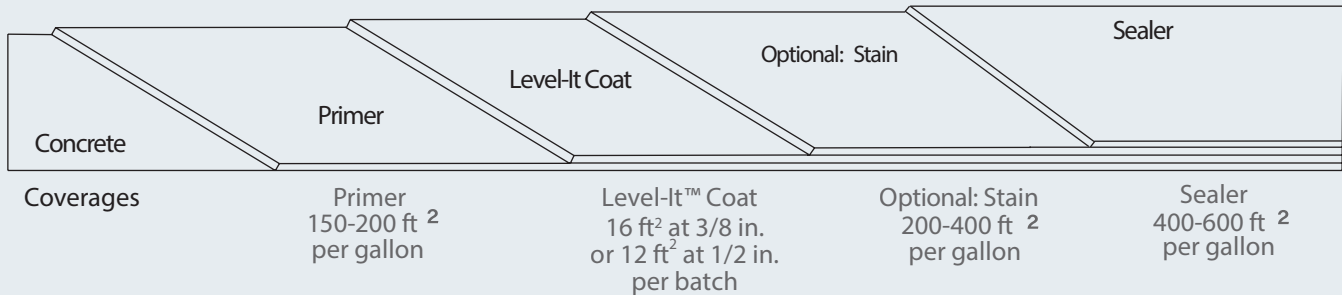

Create a blank slate for Grind and Seal or Polishing systems with Level-It!

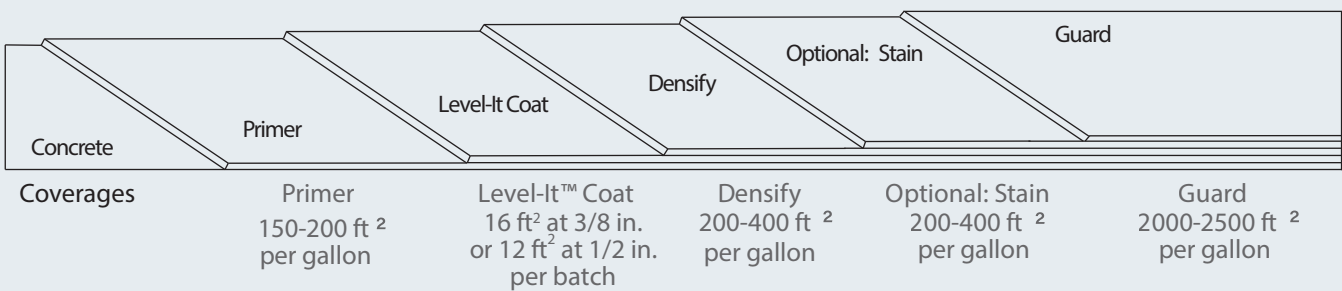

LEVEL-IT™ GRIND, STAIN and SEAL

Westcoat's Level-It™ Grind, Stain and Seal is an interior, self-leveling flooring system that provides a finished floor with the look and feel of stained and sealed concrete. It can be installed from 3/8 to 2 inches thick, then ground, stained and sealed with a variety of colors and sheens. This system provides a high-build, quick drying solution for uneven interior floors or where existing concrete substrates may not be suitable for staining and sealing.

LEVEL-IT POLISH

Westcoat's Level-It™ Polish System is an interior, cementitious, self-leveling flooring system that transforms rough and uneven concrete into a finished floor with the look and feel of stained and polished concrete. This system provides a high-build, quick drying solution for uneven interior floors or where existing concrete substrates may not be suitable for staining and polishing.

Optional Cements: Final outcome is preferential but both versions of the Level-It system can be installed successfully using TC-27 Aggregate Cement or TC-26 Gray Cement.

Advantages

Minimal Downtime • Cost Effective • High Build • High Strength • Variety of Colors and Sheens • Low VOC's
