Sealers and Topcoats

Ensure your artistry stays beautiful from day one. Westcoat sealers and topcoats are perfect for safeguarding decorative overlays and ideal for general concrete sealing and maintenance of everyday areas. The line includes low odor water-based options, fast dry options and ultra tough polyurethanes, polyureas and epoxies for heavy traffic. All sealers may be used with Westcoat Safe-Grip for a desired non-skid finish. Choose from satin or gloss finishes.

EC-11 Water-Based Epoxy

For interior application only, this is a premium two component, chemical resistant, epoxy coating with a long pot-life. It provides epoxy toughness, medium gloss and durability with the convenience of a water-based system.

- Low odor
- Moisture tolerant
- Fast drying

EC-32 High Build Epoxy Clear Topcoat

For interior application only, this two-component, 100% solids, high-build, high viscosity, cyclo-aliphatic, chemical resistant epoxy is a highly versatile epoxy coating with superior clarity.

- High build
- Chemical resistant

EC-95/96 Polyurethane Topcoat

A two component, polyester, high solids, solvenated, polyurethane topcoat. The UV resistant, mar resistant, chemical resistant nature of this product will cause it to outperform most other types of sealers or topcoats when compared. Available in pigmented and clear gloss (95) as well as a satin finish (96).

- Impact and abrasion resistant
- Aliphatic polyester polyurethane
- UV resistant

EC-100X Polyurea Topcoat

EC-100X Polyurea Topcoat is designed to be used as a finish coat for all of the Westcoat Epoxy Systems. It provides a non-yellowing high gloss, high build finish with outstanding wear resistance. EC-100X provides a faster cure. EC-100X is a two component polyurea.

- UV resistant
- 100% solids
- High build

SC-42 Water-based Acrylic Sealer

As an easy to use acrylic with a natural look, this water-based, clear concrete sealer and glaze is a cost-effective option for sealing concrete and overlays.

- Cost effective
- Semi-gloss finish
- Easy to use

SC-65/66 Water-based Polyurethane Sealer

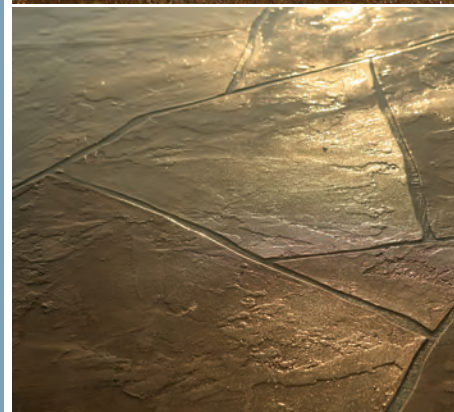

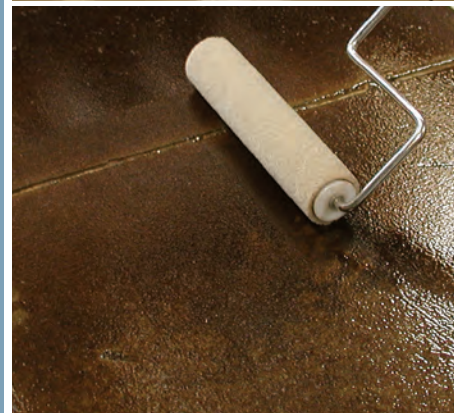

These two component, high solids, water-based, polyurethane sealers provide properties equal to that of traditional urethanes with fewer health and environmental concerns. Available in a gloss or satin version. Choose SC-65 for a high gloss finish or SC-66 for a satin finish.

- Impact and abrasion resistant
- Excellent adhesion
- UV resistant

SC-70 Acrylic Lacquer Sealer

This solvenated, fast drying, acrylic sealer, also known as Stone Glaze, offers high gloss, UV and stain resistance and is designed to create a glazed look.

- Easy to use and recoat
- Lacquer finish
- Fast drying
- UV resistant
