

DUBRO SYSTEM – Self-Educated Training

Welcome to Westcoat's Dubro Self-Educated Training. The purpose of this course is to increase your knowledge of our Dubro and Dubro Quartz systems.

Dubro is designed for use in showrooms, restaurants, garages, restrooms, commercial kitchens, auto dealerships and airplane hangars. The Double Broadcast System is a decorative, durable and chemical resistant coating, which makes it perfect for residential and commercial applications. Dubro is designed to be used as a medium to heavy duty coating.

This is a two-step process that will take approximately 45 - 60 minutes to complete. You will be required to complete a short test and submit your answers.

Education

1. Review the system overview sheet. The one---page sheet describes each step/layer of the Dubro and Dubro Quartz systems.

6. Materials Cost. Westcoat's Materials Cost Template is a powerful tool for you and your customer in order to know how much of each product to purchase to complete the job. Having this tool will also help the contractor properly bid the job, knowing what the up front costs will be. Click below, find the Dubro Cost Template, download and estimate the materials and associated cost for Dubro on a 2500 sq ft. job.

**Please note – Westcoat.com has another valuable material estimator tool on the site. If a contractor wants to know strictly the amount of material needed, with no pricing, visit: <http://www.westcoat.com/estimator.php>*

TEST

Congratulations! You are almost to the end of the training. Now to test all the valuable knowledge you've learned. Continue to the test page.

1. *Where should the Dubro system be specified?*
2. *Should concrete moisture be tested before application?*
3. *What concrete surface profile (CSP) should the surface be prepared to for proper adhesion?*
4. *What Westcoat product can be used for crack treatments?*
5. *What basic components are needed to install the Dubro system?*
6. *How much of each product would be needed to install 1500 square feet?*
7. *What mesh size aggregate should be used for a more aggressive texture?*
8. *How many broadcast coats are applied (which gives Dubro its name)?*
9. *At what rate do you apply the second topcoat?*
10. *Whats the difference between Dubro and Dubro Quartz?*
