WP Wrap

FEATURING WP-95 + WP-45

System Overview

Product Description

Westcoat WP Wrap is a supplemental waterproofing system used to provide additional waterproofing with reinforcement, along the perimeter of decks, over flashing and other challenging areas. It incorporates an asphalt-modified latex, elastomeric WP-95 Waterproofing Membrane, with a flexible engineered WP-45 Flashing Fabric, to create a seamless, reinforced waterproofing membrane.

Product Uses

Westcoat WP Wrap can be used in tandem with the ALX™ and MACoat™ waterproofing systems when additional waterproofing or reinforcement is needed.

Product Data

Components

WP-95 Waterproofing Membrane

WP-45 Flashing Fabric

Coverages

WP-95 100-150 ft² per gallon

WP-95 2nd Coat

40-60 ft² per gallon

WP-45 300 LF per roll

Shelf Life

WP-95 6 months

WP-45 N/A

Advantages:

- Seamless • Flexible/Resists Tearing • Excellent Adhesion Properties • Maintains Elastomeric Properties at Low Temperatures • Reduces Reflective Cracking • High Tensile Strength

Selling Points:

- Provides additional protection and extends the life of metal flashing
- Aids in anti-fracturing
- Helps address critical details/challenging areas
- Additional waterproofing measure
- Cost effective
- Easy to install

What to Sell Against / In Tandem With:

- Anywhere secondary or supplemental flashing is needed
- When non-metal flashing is required
- With ALX and/or MACoat systems
