

Fast Stain Training

Welcome to Westcoat's Self-Educated Training. The purpose of this course is to increase your knowledge of the Fast Stain system.

This is a two-step process that will take approximately 45 minutes to complete. You will be required to complete a short test and submit your answers.

Education

1. Training Video: This 5 minute video takes you through the step-by-step process of correctly installing **Fast Stain**.
2. Spec Sheet: These spec sheets contain detailed information on uses, materials and coverage rates for this system. The specs also have detailed instructions on the proper application steps from preparation to final coat to achieve a successful installation. Click below to read the spec sheets:

Fast Stain Grind and Seal

Fast Stain Custom

3. Materials Cost: Westcoat's Materials Cost Template is a powerful tool for you and your customers. Click below, find and download the Material Cost Template, then estimate the materials and associated cost a 500 sq ft job.

Fast Stain System Page > scroll down to find the **Material Cost Template**

*Alternatively, the **Material Estimator** shows the material needed without pricing.

4. Color Chart: The Fast Stain system is available in a variety of colors and finishes, click to review the color charts:

Fast Stain

5. Tools: Get familiar with the recommended tools needed to install this system.

Fast Stain Tool Guide

Now to test all the valuable knowledge you've learned, continue to the next page.

TEST

1. Fast Stain is an exterior floor system?
True
False
2. Why is Fast Stain considered more eco-friendly than other staining systems?
It's made of organic materials.
There's no acidic ingredients and the stain is low VOC.
3. What should be used to patch concrete prior to application?
TC-29 Concrete Patch
EC-72 Fast Cure Epoxy Patch Gel
4. What does proper prep and a porous surface allow the stain to do?
Proper prep allows the Fast Stain to soak in and react with the cement.
Proper prep allows the material to dry easily.
5. What should be mixed into the SC-36 powder for a 1-gallon batch?
A small amount of acetone.
Nothing.
6. What should be used to apply SC-36?
A chapin sprayer
A solvent safe sprayer.
7. Polishing has many steps, when is the color applied?
After each polishing step.
You can't stain during the polishing process.
8. What is recommended in between coats of Polish Guard?
Burnishing is recommended between coats.
Vacuuming.
9. What sealer(s) is recommended for Grind and Seal?
EC-11 or SC-65
EC-101 or SC-42
10. How long until vehicle is allowed after Grind and Seal is complete?
72 hours
7 days
