

ABOUT FLEX EPOXY:

Westcoat's Flex Epoxy System is a low odor, low VOC, 100% solids flexible epoxy system. The Flex Epoxy System is designed to perform as a fluid proofing, waterproofing and crack isolation membrane for concrete or plywood substrates. The system carries superior adhesion, high strength and is compatible with slip resistant additives when needed.

ULTRA-TOUGH. PROTECTIVE.

- USDA Compliant
- Chemical Resistant
- Low Viscosity
- Low Odor
- Pigmented
- Medium Build
- Seamless
- Easy Clean Up

FOR PROFESSIONAL USE ONLY.

THE SYSTEM

The Flex Epoxy System is suitable for mechanical and equipment rooms, commercial kitchens, hospitals, bathrooms, clean rooms, shopping malls and on concrete substrates located above occupied spaces. The Flex Epoxy System can also be used as a membrane underneath a variety of Westcoat's systems when waterproofing, sound dampening and crack isolation attributes are required.
